

## Course Synopsis

The Palliative Care Centre for Excellence in Research and Education (PaIC) is offering a 1.5-day programme in basic qualitative research designed for healthcare professionals who are interested to embark on qualitative research. Participants will have the opportunity to learn the basic elements required to get started on a qualitative research study.

## Course Content

- The Elements of the Research Process
- Research Design in Qualitative Research: Formulating a Research Problem, Sampling, Getting Started
- Overview of Research Methodologies
- Methods for Data Gathering (Interactive)
- Data Analysis (hands-on)
- Researcher Positionality

## Who Should Attend

Healthcare professionals interested in venturing into qualitative research in health professions education, health education and promotion, and health services.

Registration closing date: 10 January 2020

For any enquiries, please contact:  
Toh Yan Hua  
Executive, NHG College  
Tel: 6340-2355

## Trainer

---

**Dr Khoo Hwee Sing, PhD**

**Senior Research Analyst, Health Outcomes and Medical Education Research (HOMER)**

**National Healthcare Group**

Dr Khoo adopts a multi-disciplinary approach in her work, and believes it is essential to bridge research and practice for better sharing, integration, and application of knowledge. This motivates her to view research through different theoretical lenses, and incorporate phenomena into research for educational and practical applications. At HOMER, she is involved in projects on communication, resilience, ethics, and leadership. This involves analysing data from all stakeholders in the healthcare process to provide valuable inputs for curriculum design, and for the improvement of the patient-doctor communication process.

Dr Khoo holds a PhD in Management from the National University of Singapore. She serves on the National Transplant Ethics Panel of Laypersons, and is a member of the NUH Bioethics Committee.
