

**Certificate in Community Palliative Care: Psychosocial Care.** Access to supportive care, palliative care and end-of-life care are essential for persons living with an advance illness. In this course, community health and social care professionals will be offered a foundational overview of psychosocial issues faced by their clients living across illness trajectories in the community, and consider their roles in providing holistic support.

## Course Objectives

1. Articulate the philosophy and models of palliative care, end-of-life care & supportive care (PES)
2. Define illness trajectory & its impact on psychosocial well-being
3. Understand symptoms & their psychological impact
4. Apply the biopsychosocial & spiritual framework of assessment
5. Understand decision-making at end-of-life
6. Use of Advanced Care Planning & Lasting Power of Attorney
7. Understand grief & grief management
8. Involve caregivers & family members as care partners & service users
9. Discover ways to work within & across inter-professional teams
10. Explain care management, referral & co-ordination in PES care
11. Identify resources & schemes applicable to PES care
12. Recognize the importance of self-care of the professional

## Training Methodology

Synchronous online lectures, virtual small group discussions, course materials posted on online learning portal.
