Course Objectives

Through a series of mini interactive lectures on stress, resilience, dignity and compassion in care, as well as engaging in mindfulness meditation practices, art making, reflective writing and group discussions, participants will learn how to apply mindfulness meditation and expressive arts into their own clinical work and self-care practices.

Relevant research findings on the effectiveness of MCAT in promoting wellness and cultivating resilience will also be shared to inform and encourage evidence-based practice and professional training management.

Training Methodology

Dialectic teaching and experimental learning with face-to-face instructions, mindfulness meditation exercise, expressive art-making activities, large and small group discussions, reflective exercises, as well as pre-course readings

Course Outline (2 days)

The workshop will focus on experiential learning techniques to apply theory and research to expand participants' cognitive knowledge, practical skills and emotional competence for self-care. It will cover the following topics in a fully immersive experience:

- Stress and burnout
- Compassion fatigue and moral distress
- Dignified and compassionate care
- Grief and loss in professional caregivers
- Basics of MCAT
- Mindfulness meditation
- Expressive arts therapy
- Meaning making and resilience building

Venue

TTSH Centre for Healthcare Innovation, Level 2 Hall 1
18 Jalan Tan Tock Seng, Singapore 308443
