

Workshop on Burnout and Self-Care

Course Objectives

Through a series of mini interactive lectures on stress, resilience, dignity and compassion in care, as well as engaging in mindfulness meditation practices, art making, reflective writing and group discussions, participants will learn how to apply mindfulness meditation and expressive arts into their own clinical work and self-care practices.

Relevant research findings on the effectiveness of Mindful-Compassion Art-based Therapy (MCAT) in promoting wellness and cultivating resilience will also be shared to inform and encourage evidence-based practice and professional training management.

Target Audience

- Doctors, Registered Nurses, Advanced Practice Nurses, Enrolled Nurses, Support Care Staff, Allied Health Professionals, Psychosocial Staff, Senior Management, Corporate Services Staff
- Individuals from all walks of life who are faced with caregiver stress and risks of burnout

Training Methodology

Dialectic teaching and experiential learning with face-to-face instructions, mindfulness meditation exercise, expressive art-making activities, large and small group discussions, reflective exercises, as well as pre-course readings.

Course Outline

The workshop will focus on experiential learning techniques to apply theory and research to expand participants' cognitive knowledge, practical skills and emotional competence for self-care. It will cover the following topics in a fully immersive experience:

- Stress and burnout
- Empathy distress and moral distress
- Dignified and compassionate care
- Grief and loss in professional caregivers
- Basics of MCAT
- Mindfulness meditation
- Expressive arts therapy
- Meaning making and resilience building
