

Talk on Care at the End-of-Life

What do we know about death and dying? Has it been medicalized?

This 4.5-hours workshop will give participants an understanding of the nursing, psychosocial, spiritual needs of patients at the end of life.

Course Objectives

Participants would be able to:

- Recognize and effectively manage common symptoms experienced by patients in their last hours
- Describe at a basic level the psychosocial and spiritual needs of terminally ill patients, and employ appropriate interventions to address these needs
- Discuss the unique needs and challenges of communication at the end-of-life, and utilize effective strategies to facilitate compassionate and meaningful interactions
- Identify the needs and challenges of communications at the end-of-life
- Recognize the role of the nurse in relation to the patient and caregivers in the dying phase

Training Methodology

Didactic lecture, group discussions on case studies, Multiple Choice Question assessment.

Target Audience

Registered Nurses, Enrolled Nurses, Support Care Staff.

Course Outline

The following topics will be covered:

- Understanding Death Attitudes in Singapore
- Common Signs and Symptoms in the Final Hours
- Management of the Symptoms in the Final Hours
- Role of the Nurse in End-of-Life Care
- Basic Communications
